**MORE HIGH GRADE MOLYBDENUM AT ANTHONY PROSPECT**

**Highlights**

- High grade (>750ppm) Molybdenum (“Mo”) assayed in 12 holes drilled to date
- High grade zone extended in area and depth
- Deeper diamond drilling extensions of reverse circulation (RC) holes is continuing

The current drilling programme at Zamia’s Anthony molybdenum prospect in the Clermont district of central Queensland is 50% complete. Drilling is targeted on a previously identified high grade zone and is designed to demonstrate continuity of mineralisation and to establish an initial resource to JORC standard.

A summary of significant assay results to date is provided below.

**Table 1 Summary of results – current drilling**

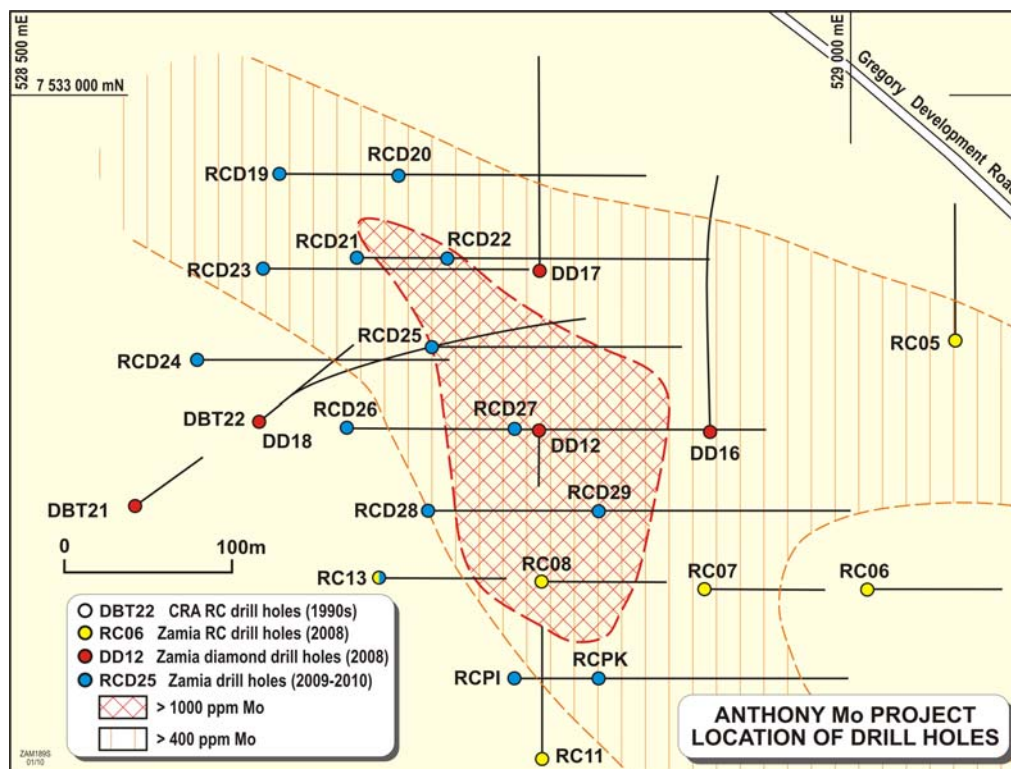

Hole ID		From (m)	To (m)	Interval (m)	Mo (ppm)	Comments
RC013	Reported 2008	111	141	30	1065	Sulphide
RCD013	2009-10 Diamond tail	152	284	132	772	Sulphide
	including	160	220	60	977	Sulphide
	including	250	262	12	1194	Sulphide
RCD019	2009-10 RC Drilling	132	144	12	542	Sulphide
	2009-10 Diamond tail	226	228	2	951	Sulphide
	2009-10 Diamond tail	256	258	2	1115	Sulphide
RCD020	2009-10 RC Drilling	183	188	5	885	Sulphide - end of hole (EOH)
RCD021	2009-10 RC Drilling	165	239	74	627	Sulphide
	including	213	239	26	856	Sulphide
	2009-10 Diamond tail	239	304	65	751	Sulphide
	including	239	272	33	1045	Sulphide
RCD022	2009-10 RC Drilling	165	198	33	895	Sulphide
	including	174	198	24	1009	Sulphide - EOH
RCD023	2009-10 Diamond tail	237	299	62	675	Sulphide
	including	237	255	18	838	sulphide
	including	271	281	10	1431	sulphide
RCD025	2009-10 RC Drilling	156	162	6	860	sulphide
RCD026	2009-10 RC Drilling	135	147	12	772	sulphide
RCD027	2009-10 RC Drilling	0	81	81	524	oxide
	2009-10 RC Drilling	81	204	123	779	sulphide - EOH
	including	81	126	45	1010	sulphide
	including	171	189	18	906	sulphide
RCD028	2009-10 RC Drilling	144	168	24	800	sulphide - EOH
RCD029	2009-10 RC Drilling	0	93	93	568	oxide
	2009-10 RC Drilling	93	120	27	1194	sulphide

Previous drilling in the western high grade zone in 2008 also resulted in significant intersections as indicated below.

**Summary of past drilling results for Western high grade zone**

Hole ID		From	To	Interval	Mo (ppm)	Comments
RC008	RC Drilling 2008	0	63	63	608	Oxide
		63	84	21	827	Sulphide
		117	132	15	815	Sulphide
RC011	RC Drilling 2008	66	99	33	579	Sulphide
		99	135	36	647	Sulphide
		135	150	15	936	Sulphide - EOH
RC012	RC Drilling 2008	0	75	75	617	Oxide
		75	150	75	1103	Sulphide
DD012	Diamond Drilling 2008	192	238	46	739	Sulphide
		272	288	16	744	Sulphide
DD016	Diamond Drilling 2008	44	66	22	710	Oxide
		120	128	8	653	Sulphide
		150	164	14	625	Sulphide
		176	184	8	673	Sulphide
		234	248	14	681	Sulphide
DD017	Diamond Drilling 2008	18	34	16	508	Oxide
		160	170	10	679	Sulphide
DD018	Diamond Drilling 2008	134	351.5	217.5	736	Sulphide
		including	226	320	94	1108

The locations of the drill holes are indicated in the figure below.

Diamond drilling is continuing at Anthony. As announced on 7 January, the RC drill rig has been relocated to test the Matilda gold target, 20 km northwest of Anthony.

A handwritten signature in black ink, appearing to read 'K. Maiden', with a large, stylized initial 'K'.
